Black Beauty

I wanted to capture the beauty of a black female, and inspire confidence in black girls by showing them someone who looked like them who was strong and beautiful. This is a digital drawing.
Brendon Urie

Urie is a favorite of mine, simply because he is a good person as well as a good musician. He is inspiring and talented, and his music has helped me through some tough times in my life. He has a good aesthetic, in my opinion, and I wanted to capture that. This is a digital drawing.
Queen Frigga

Queen Frigga of Asgard (in the Marvel Cinematic Universe), played by Rene Russo, is a powerful, strong woman, who takes no nonsense from anyone. She is radiant, which is the quality I tried to portray here. This is a digital drawing.
Little Lion Girl

This is a watercolor painting.
In the Marvel Cinematic Universe, Loki Laufeyson is the rightful heir to the throne of Jotunheim. In the *Thor* movies, his Jotun form is not shown. He is the adopted son of Odin, an Aesir of Asgard, who in appearances, is very human-like. Here, I depicted my take on what Loki would look like in his true form. This is a digital drawing.
Trouble

This work is basically just an outfit design I came up with and thought was attractive, then put on the Marvel character Loki Laufeyson. In the comics, Loki is genderfluid and tends to defy gender roles. As such, I gave him a skirt, something typically worn by females, to show that I, too, wish to break down the “norm” for genders and let people be who they want. This is a digital drawing.
Miss Maria Reynolds

This is a character from the hit Broadway musical *Hamilton*, Maria Reynolds. In the play, she seduces the protagonist at the will of her abusive husband, James Reynolds, who then coerces the main character into paying for more of her. I wanted to capture her beauty and allure in this digital drawing, as well as her vulnerability, as seen by her eyes being so bright. This is a digital drawing.
Melanie Martinez

This is an earlier work of mine, first sketched in pencil, then outlined in pen and colored with alcohol markers. The inspiration for this piece comes from my seeing a picture of her. I immediately wanted to draw her likeness, and try to replicate the beauty I saw.
Polka-Dot

This work is a portrait of my friend Otis, who is not the least bit shy about his sexuality. I referenced a picture of him with an Instagram filter over his face. He had asked me to do a picture of him, and I obliged, and this was the end result (he loved it, by the way). This is a digital drawing.
This is the Pride Rock from *The Lion King*. I have always been a fan of classic Disney movies, and so I made a rendition of a setting from one of my favorite movies. I used watercolor for this piece.
